

TRISKELION

AUTHORIZATION OF BIOCIDAL PRODUCTS UNDER BPR

The ongoing review of existing biocidal active substances is expected to be finalized in the coming years. If your biocidal products contain such active substances, now is the time to look at what action you need to take. That is where you can rely on our expertise.

We identify the regulatory status of active substances in your products, and then advise you on the best way forward. This will result in a successful authorization, so that you can continue to sell your product.

TRISKELION

AUTHORIZATION OF BIOCIDAL PRODUCTS UNDER BPR

We have an extensive network within the competent authorities and in-depth knowledge of the biocide industry. We facilitate cooperation on dossiers and the exchange of biological data between companies, as well as communicate with your clients. Our expertise in (eco-) toxicology and analytical chemistry combined with state-of-the-art risk assessment methods makes us your perfect partner.

Here is a taste of what we offer:

- BPR quick scan: assessing product portfolio compliance
- Analysis of regulatory requirements
- Mediation in obtaining a letter of access
- Check on the completeness of existing biocide dossiers
- Quality assessment of existing information and data-gap analysis
- Cost-effective strategy with a minimum amount of studies, scientific-based waivers and applying the biocidal product family (BPF) concept
- Efficacy testing of your product
- Risk assessment of your product
- Dossier compilation and submission
- Assistance in dealing with the evaluating competent authority

TRISKELION offers testing and consultancy services to clients active in the food, feed, (agro)chemical and pharmaceutical industries. Our goal is to help develop products that improve the health and wellbeing of your customers.
