## AUTHORIZATION SERVICES FOR PLANT PROTECTION PRODUCTS

Having invested a lot in the successful marketing of your plant protection products, securing regulatory approval of active ingredients and formulated products is an essential yet long and costly path, involving multiple areas of expertise. We are ready to work together with your registration team to compile the information required to (re-)authorize your active ingredients and plant protection products.

## AUTHORIZATION SERVICES FOR PLANT PROTECTION PRODUCTS

We have an extensive network within the competent authorities and in-depth knowledge of the agrochemical industry. We facilitate cooperation on dossiers and the exchange of (test) data between companies. Our expertise in (eco-)toxicology and analytical chemistry combined with state-of-the-art risk assessment methods makes us your perfect partner.

We can complement your registration team with key aspects of preparing the (re-) authorization dossiers, such as:

- Literature search and quality assessment of existing data
- Mediation in obtaining a letter of access
- Monitoring of tests and preparation of study summaries of physico-chemical, (eco-) toxicological and environmental fate studies
- Analytical support for residue determination including method development and validation
- Environmental fate assessment (FOCUS-PEARL)
- Risk assessment of plant protection products, covering environmental and human health
- Risk assessment of residues in accordance with EFSA guidance
- Application of alternative methods (QSARs, read-across) and preparation of scientific justifications
- Preparation of maximum residue level (MRL) applications
- Assessment of endocrine disruption potential according to relevant guidance

TRISKELION offers testing and consultancy services to clients active in the food, feed, (agro)chemical and pharmaceutical industries. Our goal is to help develop products that improve the health and wellbeing of your customers.
